# Interim Report

Training at 10 Academy has been interesting, intensive, and overwhelming, but it's a win-win situation for me. 10 Academy is looking for active participants with a strong work ethic and the potential to become good group members—individuals who can ask and answer questions, discuss issues on Slack and other platforms, and last but not least, people who are curious about learning new things. Although the training is conducted fully online, which is perfect for some participants but not for all of us. For instance, yesterday, I was not able to attend the session fully. Unfortunately, we faced an unexpected power outage in our area, resulting in a complete loss of electricity. However, this did not stop me from attending the session. I had to go to a café (which had power and Wi-Fi), but I couldn't say I fully attended the session. Therefore, in order to catch up, I have to watch the session again, but I must wait until around 6 pm. It would be better if it were uploaded earlier.

Currently, I am facing an error, and I asked for help. I received some responses from participants, including the 10 Academy teams. Unfortunately, I haven't solved the error yet. I hope it will be resolved as soon as possible. I am happy to be a part of it
